UH College of Engineering

Re: Job Posting for Jr. Civil Engineer

Orion Engineers & Associates is seeking candidates for an entry level civil engineering position at our Honolulu office. The position involves general civil engineering design as well as design of airport facilities including runways, taxiways, aircraft aprons, airfield electrical improvements, drainage, grading and other such airport civil infrastructure. The successful candidate will assist senior level engineering staff in providing civil engineering services from the conceptual level through to detailed bid documents on major infrastructure projects. Day-to-day tasks will include plan production using AutoCAD and Civil 3D, quantity calculations for cost estimating, grading and drainage design, and permitting. The chosen candidate will work full time from the Orion corporate office in Downtown Honolulu and must possess a Hawaii driver's license.

Qualified candidates must be a graduate of the college of engineering with a focus on Civil Engineering. The ideal candidate will have a background using AutoCAD and/or Civil 3D and proficient in Microsoft Office Suite. Candidates must be highly resourceful and possess excellent interpersonal and organizational skills. They must have excellent verbal and written English communication skills and the ability to work well independently, as well as in a team environment.
