

Come build with us. Exciting new, large-scale project at Joint Base Pearl Harbor-Hickam.

Responsibilities

- Reviews and tracks design packages' status, generates, and follows up with the request for information (RFIs) or field design change requests.
- Attends pre-shift meetings and weekly MOT (Maintenance of Traffic) meetings.
- Inspects field work to verify monthly payment request from contractors.
- Coordinates and verifies concrete waste.
- Responsible for 4-week-look-ahead schedule for self-perform work or as provided by subcontractor.
- Generates weekly or monthly reports related to the progress of the project.
- Generates permit modifications or close current permits and tracks its status.
- Responsible for ticket collection and tracking (concrete-asphalt-dirt).
- Responsible for drafting and compiling daily reports.
- Assists in the preparation of detailed requisitions for material purchases, services, and subcontracts.
- Assists in the preparation and issuance of specifications, data sheets, and other construction documents.
- Establishes and maintains relationships with clients in order to define their needs, explain technical information, concepts or study results.
- Verify and complete request for proposals (RFPs), estimates, and other technical documents.

We are looking for newly degreed to experienced engineers to join our team. This is a joint venture project with Dragados-Hawaiian Dredging-Orion. Please tell us a little bit about yourself and send resume to: tdeiner@dhojv.com.
