

COLLEGE OF ENGINEERING

Connecting education to industry

RECRUITMENT OPPORTUNITIES

Our semiannual Career Expo, offered both virtually and in person, regularly attracts roughly 100 employers from Hawai'i and the U.S. Continent. Hundreds of students attend each semester to learn about job and internship opportunities. Additionally, our online jobs board connects employers with students year-round through a convenient submission and posting process.

INDUSTRY-INFUSED EDUCATION

From our Pearl Harbor Co-op program to the Community Innovation Mentorship Program, we offer our students numerous opportunities to build relationships with employers and gain real-world experience while providing solutions to challenges facing the community and nation, all while earning college credit.

ALUMNI ENGAGEMENT

We provide opportunities throughout the year to foster alumni engagement, from events such as our Holmescoming fall social to our Annual Banquet to the Alumni Golf Tournament in the summer. Serving as a hub for Hawai'i's engineers, we connect students, faculty, and alumni with members of industry to build a stronger engineering community.

Reaching out to the community

- Engineering Student Ambassadors public outreach initiatives
- Native Hawaiian Science and Engineering Mentorship Program
- Junior Engineers Summer STEM Experience (JESSE)
- EngineeringHI, an academic mentorship program for high schools
- Pacific Summer Transportation Education Program
