

Project Manager – Job Description

Carollo Engineers is a nationally recognized environmental engineering firm that specializes in the planning, design, and construction of water and wastewater facilities. Our vision is to become the best water consulting firm in the United States, and we are looking for motivated, talented people to help us reach that goal.

We are seeking a Project Manager to support Carollo's vision of becoming the best water consulting firm in the United States. As part of our team, you will work on projects related to municipal water and wastewater treatment plants, including but not limited to major treatment plant expansions, regional water quality studies, and critical water reuse projects that will create sustainable and resilient water supplies for the world.

Responsibilities

- Manages the successful execution of water and wastewater utility projects
- Applies acute technical and project delivery knowledge to advise clients throughout the project life cycle and meet or exceed budget, schedule, and quality goals
- Leads and oversees project teams in the planning, design, construction, and/or commissioning of projects of various sizes
- Supervises and coordinates the work of staff engineers, drafters, technicians, and others who assist with specific assignments
- Prepares reports, technical memoranda, specifications, and cost estimates
- Maintains a culture of effective communication among project teams, clients, partners, and other stakeholders
- Partners with local business development teams to identify project opportunities and assists with proposal preparation, including project scopes and cost estimates

Qualifications

- Bachelor's degree in Civil or Environmental Engineering
- 15+ years of water project experience
- Experience delivering and managing water treatment, water transmission/distribution, water storage, groundwater wells, and master planning projects
- Registration as a Professional Engineer (or the ability to obtain it through reciprocity within 6 months of employment)
- Experience in the design and construction phase of small, medium, and large sized water and/or wastewater infrastructure projects with full responsibility for budget, schedule, contractual obligations, and quality standards
- Strong verbal and written communication skills. Ability to communicate effectively with clients and project team
- Works well in a team environment
- Ability to deliver high quality services within budget and schedule constraints

Preferred Qualifications

- Master's degree in Environmental Engineering
- Design and construction phase experience

Salary Range: \$150,000 - \$200,000
