

Inside Micron & the Semiconductor Industry

Early-Talent Career Huddles
ETCH connections. Build knowledge.

Who should attend

Students and recent college grads interested in engineering, technology or business functions connected to semiconductors

What you'll gain

- Overview of Micron and the semiconductor industry
- Perspective from interns and new grads on life at Micron
- Insights into open opportunities at Micron
- Time with Micron recruiters in Q&A and breakout conversations

Location: Virtual Zoom (*Live only; session will not be recorded*)

Sharpen your skills with Micron. Scan the QR code or [click to register!](#)

Moderated by

Lenée Young,
Senior University Recruiter

Date/Time: Thursday, Feb 5 | 3:00 – 4:30 PM ET

Learn about Micron's work, how chips are made and why semiconductors matter. We'll also highlight current internships, full-time roles and host a panel with former interns & new college grads.

Micron powers the future with memory and storage solutions that transform how the world uses information.
